Art Unit: 2621

***Allowable Subject Matter***

1. After a further search and a thorough examination of the present application and in light of the prior art made of record, claims 1-8 are found to be in condition for allowance.

***Reasons for Allowance***

The following is an Examiner's statement of reasons for the indication of allowable subject matter:

The claims are allowable over the prior art of record since the cited reference taken individually or in combination fails to particularly disclose an image processing method and apparatus comprising a presenting means for presenting, to a user, image pairs detected by at least one of the first and second detecting means, and generating means for setting one of two image comprising a selected image pair selected by the user among the image pairs presented by the presenting means as an image for the left eye and the other one of two images as an image for the right eye, and generating image data for displaying a stereoscopic image.

The closest prior art (Mayhew US Patent no. 5,510,831) discloses a similar method for displaying a stereoscopic image. However, Mayhews fails to particularly teach or suggest "*presenting, to a user, image pairs detected by at least one of the first and second detecting means, and generating means for setting one of two image comprising a selected image pair selected by the user among the image pairs*

*presented by the presenting means as an image for the left eye and the other one of two images as an image for the right eye, and generating image data for displaying a stereoscopic image.*" as claimed.

### ***Conclusion***

2. Any comments considered necessary by applicant must be submitted no later than the payment of issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submission should be clearly labeled "Comments on Statement of Reasons for Allowance".
